

I need milk, but  
I don't have a cow

No worries bro,  
Local dairy produces enough milk,  
Go there and buy some!

Oh yeah, that's a great idea!  
I don't need to do everything on my own,  
There are external services available

That's also how APIs work!  
There's something that someone else does,  
you can ask for that information from them.

**THAT'S SO COOL!!**
